Preventing the Spread

Helpful tips to avoid the Coronavirus

Don't want to practice
CDC safety guidelines?
The Coronavirus looks
forward to meeting you.

Always wear a mask, practice
social distancing, and wash
your hands frequently to
increase your chances of
keeping this unwanted
acquaintance away.

Preventing the Spread

Helpful tips to avoid the Coronavirus

It's a simple task – put on the mask.

Masks trap respiratory droplets inside them, potentially keeping the Coronavirus away from others. When you wear a mask, your action tells others, “I care about you!”

Preventing the Spread

Helpful tips to avoid the Coronavirus

**Be a sweetheart –
stay at least 6 feet
apart.**

The Coronavirus wants to reach as many people as it can. Keep this virus as far out of your reach as possible by practicing social distancing from others whenever possible.

Preventing the Spread

Helpful tips to avoid the Coronavirus

Beat the unseen – keep your hands clean.

The Coronavirus may be invisible to the naked eye, but you don't need to see it to remove it from your hands. Wash your hands frequently for at least 20 seconds or use hand sanitizer with at least 60% alcohol, and you'll help prevent the spread of this virus.
